Professional Summary

Backend Developer with 2+ years of experience specializing in Node.js, Express.js, and MongoDB. Proven track record of developing secure REST APIs, containerizing microservices with Docker, and optimizing database query performance.

Technical Skills

- Languages/Frameworks: JavaScript (ES6+), Node.js, Express.js
- Databases & Tools: MongoDB, Mongoose, Redis (Basic), PostgreSQL
- DevOps & Cloud: Docker, Docker Compose, Git, GitHub Actions, Linux
- Core Concepts: REST APIs, JWT Auth, MVC Architecture, Event-driven architecture

Experience

Software Engineer - TechCorp Solutions (June 2024 - Present)

- Developed scalable REST APIs using Express.js and Node.js serving 50k+ daily active requests.
- Designed MongoDB indexing strategies, reducing API response times by 30%.
- Implemented secure JWT-based authentication and role-based access control (RBAC).
- Containerized backend applications using multi-stage Dockerfiles.

Projects

Real-Time Notification Engine

- Built a decoupled notification service with Redis pub/sub and WebSockets in Node.js.

Education

B.Tech in Computer Science & Engineering (2020 - 2024)
